

About us

Allbebet is an infrastructure project in the sports and gaming area created for higher sports achievement by using neurointelligence and blockchain technology.

The Allbebet company direction of development is business model making based on innovative technologies that can unite millions of people from sport, gaming and betting industry.

ALL BLOCKCHAIN

PRODUCT

Allbebet.bet* is a platform for sports and e-sports betting establishing direct connection between users based on blockchain technology and smart-contracts. Introduction of blockchain technology in the current bookmakers business model allowed us to create an environment with total lack of control over users and their funds by any third party.

Application work logics is based on smart-contracts which helped to achieve total performance and constant conditions thus solving a lot of problems with biased attitude to users from bookmakers. All operations on the platform go in ALB tokens which helps to be protected from the influence of external factors.

Intelligent analytics and rating system allow users to totally focus on gaming process forgetting about any restrictions.

Technical solution:

1. Interactive Web platform.
2. Mobile betting apps for IOS and ANDROID.
3. Telegram bot for betting
4. Wallet
5. An intelligent ratings and Analytics used technology

Applied technology:

1. Blockchain
2. Statistical Modeling,
3. Artificial Neural Networks,
4. Deep Learning,
5. Collective Intelligence

BETTING INDUSTRY PROBLEMS

The use of Blockchain will solve the main problems in the field of betting. Blockchain technology provides full transparency of transactions and guarantees the reliability of data. No one will be able to cancel or change your bid because it is impossible to affect the recording on all network nodes. Using a distributed registry protected by cryptographic algorithms will increase the level of security and trust of users.

Thus, the application lacks such problems as:

- Return of triggering bet
- Unfair conditions
- Fight with successful players
- Obstacles to withdrawal of funds
- Hacking of centralized architecture within the platform
- Hacking of centralized architecture

ALLBEBET SOLUTION AND FUNCTIONALITY

1 SINGLE AND TEAM BETS.

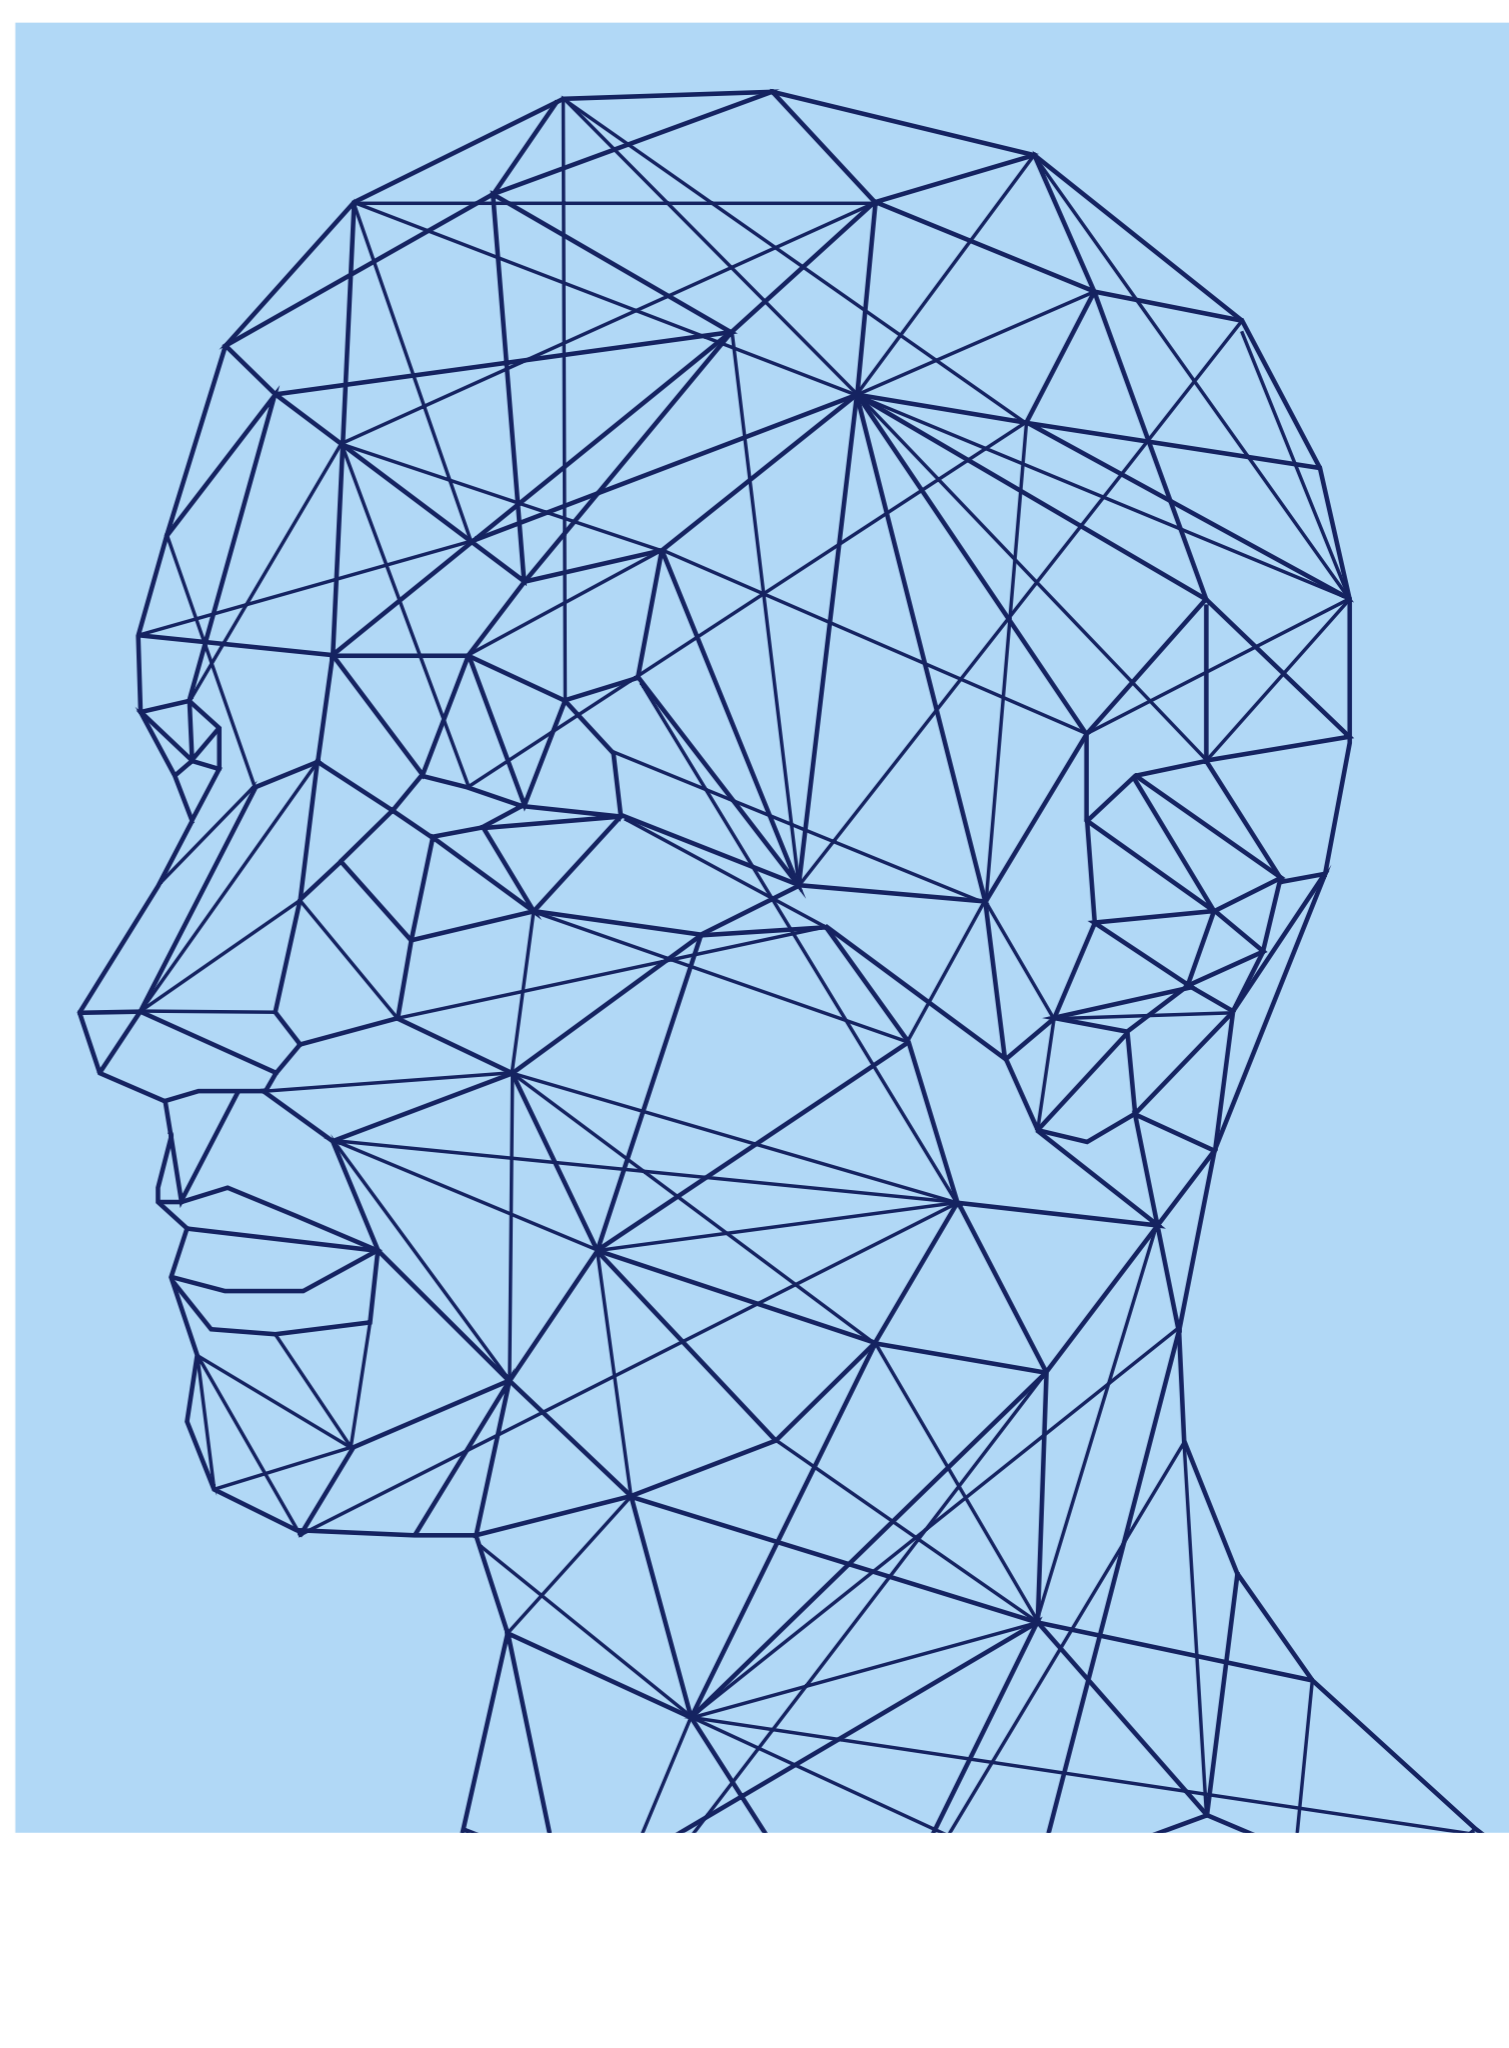

Bet conditions go to smart contracts which cannot be changed by any third parties or the Allbebet platform. Simple and intuitive interface.

2 RATINGS, ANALYTICS AND PREDICTIONS.

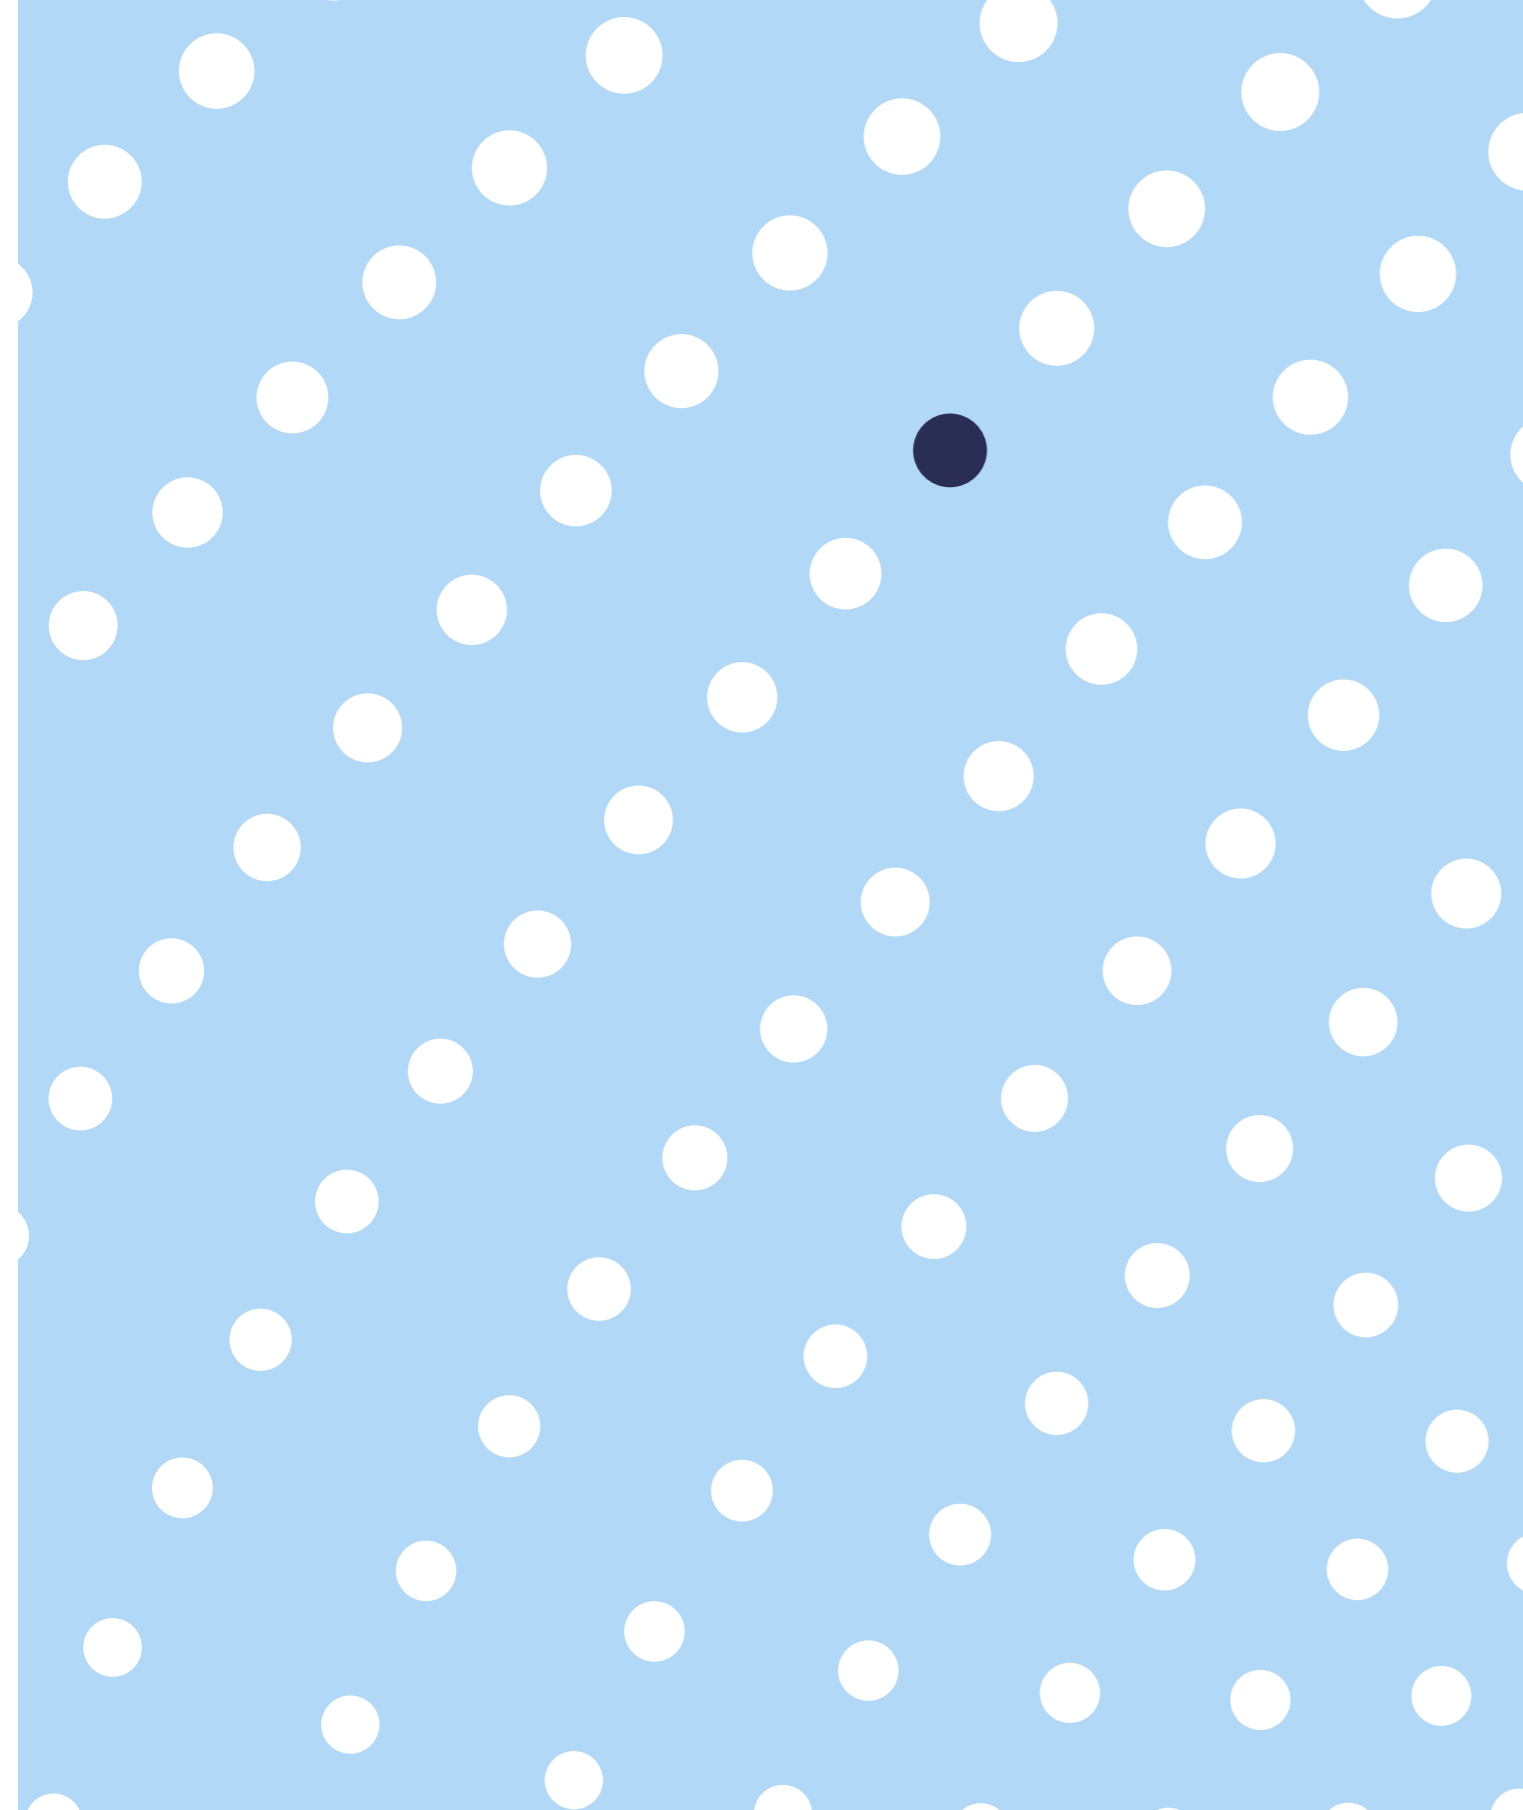

Neural network algorithm of user activity ranking allows to accurately assess player's activity on the platform. For every effective action the platform adds rating and bonus points to players which can be used in other ALLBEBET services.

3 CHAT.

Built-in multilingual chat. Opportunity to create groups to communicate with players, fans, clubs.

WHAT MAKES US SPECIAL

Our team is highly qualified specialists in the field of artificial intelligence, machine learning and programming, with extensive experience in the design and creation of neurointelect systems.

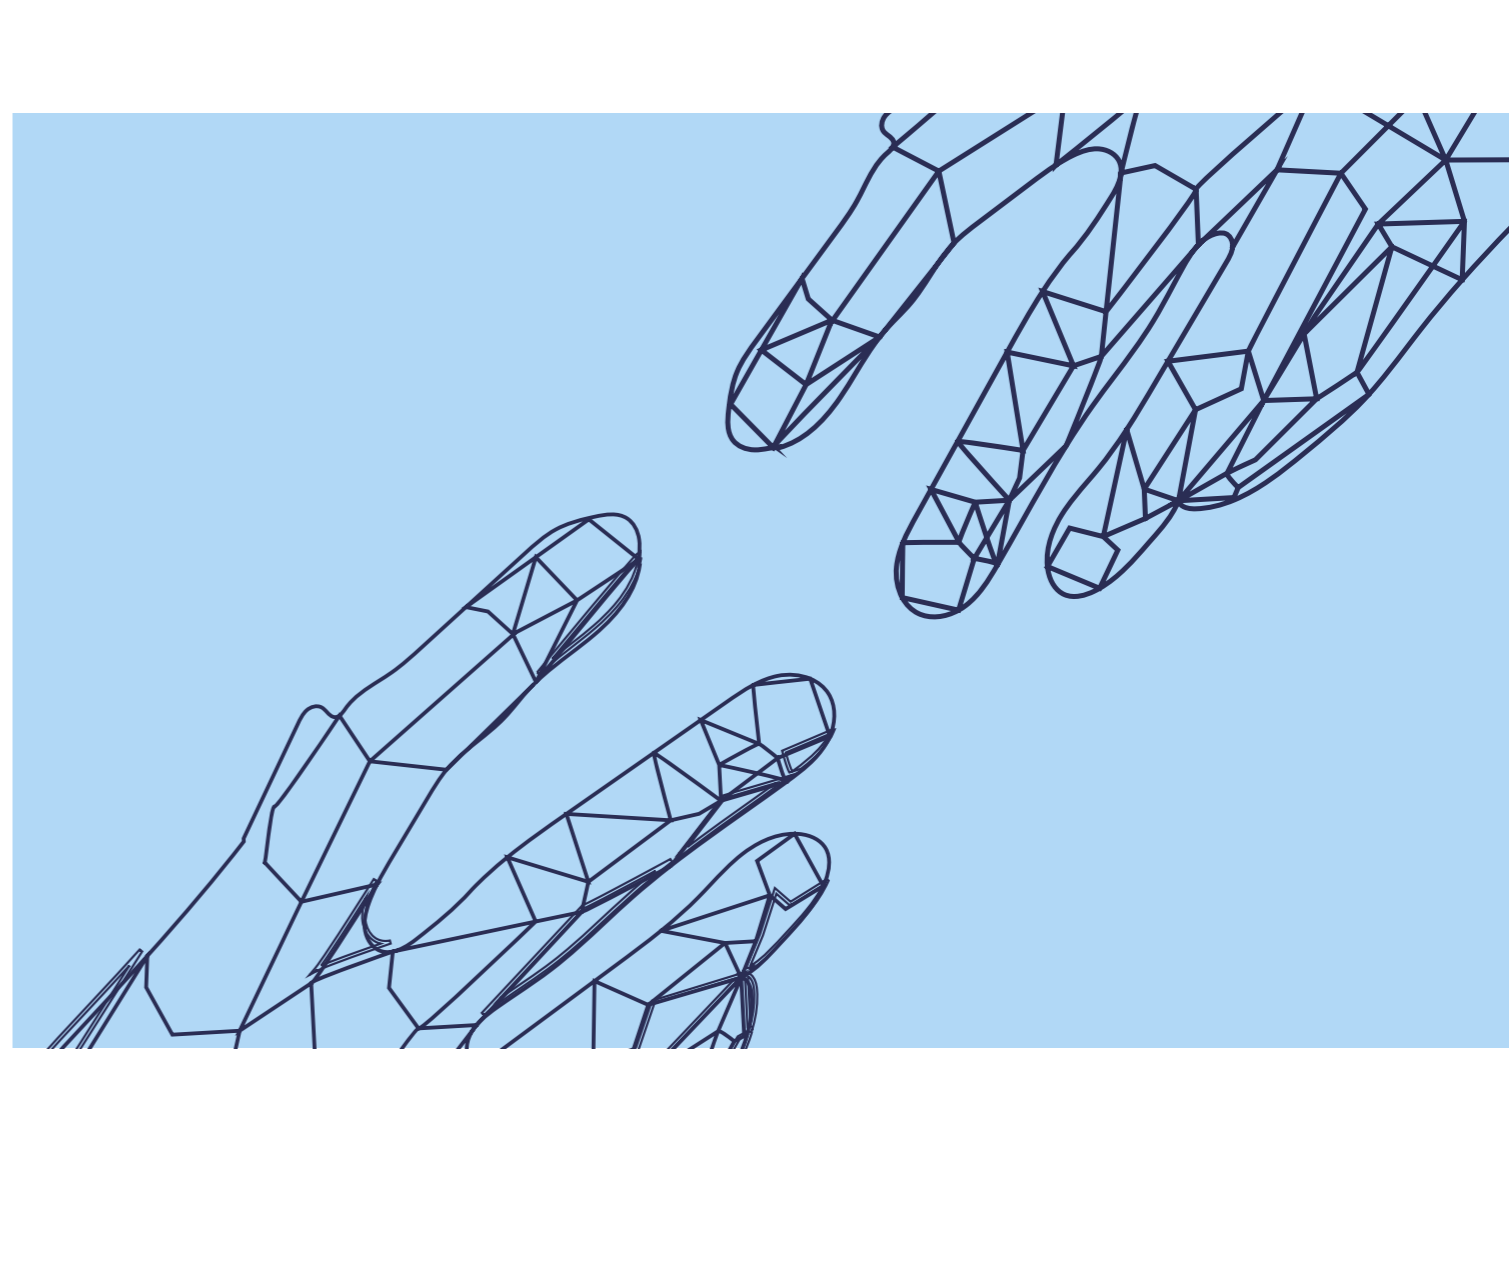

Innovative and competitive technology:

- Statistical Modeling,
- Artificial Neural Networks,
- Deep Learning,
- Collective Intelligence,
- Autoencoders,
- Artificial Immune Systems,
- Multi-agent systems,
- Self-organizing and adaptive systems,
- Sentiment analysis,
- Convolutional NN,
- Recurrent NN,
- Hierarchical-Temporal Memory.
- Blockchain

The ALLBEBET OU company is established in the Republic of Estonia. The company has all necessary legal documents to carry out legal activity, patented scientific works as well as licenses for virtual currencies exchange and storage.

VECTOR OF DEVELOPMENT OF THE COMPANY

- 1 Changing the paradigm of players interaction in the betting.
- 2 Optimization and improvement of training processes in sports.
- 3 Creation of a single virtual database of athletes for analysis, statistics and forecasting.
- 4 Create available products using neuroelect and blockchain.

ALB-TOKEN. ALB TOKEN DESCRIPTION.

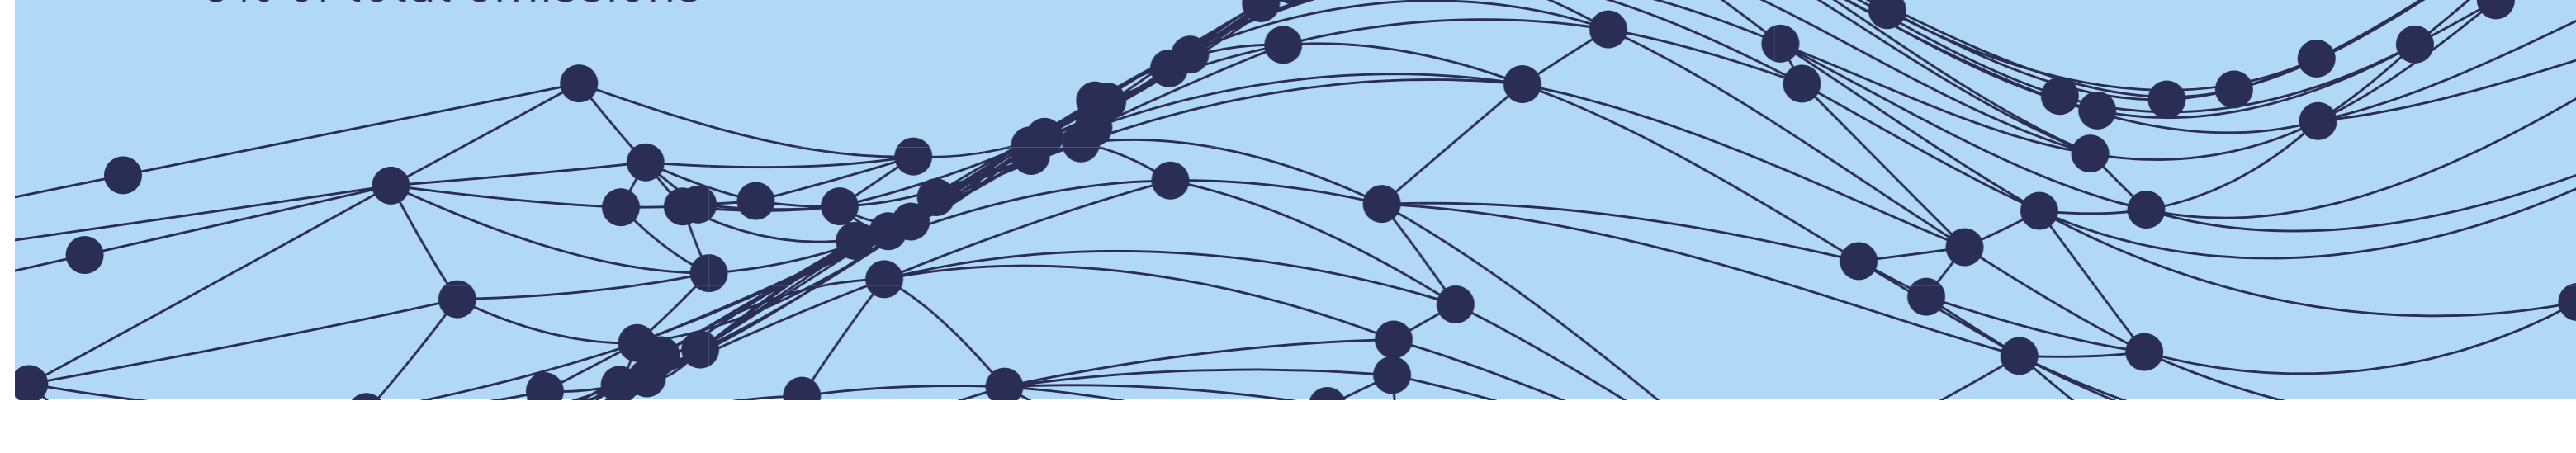

Token name: Allbebet (ALB)
Token issuing platform: Ethereum
Standard: ERC20
Total number of tokens: 1 000 000 000

1 round:
1% of total emissions

2 round:
3% of total emissions

Emission intensity: Additional issuance is not possible

The company is the Issuer of the virtual currency: Allbebet OU Estonia

ALB TOKEN USAGE:

- Possibility to place bets inside the platform.
- ALB token exchange to another cryptocurrency or Fiat in a few clicks.

- Section "Auction" allows you to buy on the platform goods and services of clubs, players, sports partners, for the ALB token.

- The ability to produce associations with partners and allow to integrate fully or partially the token ALB into their infrastructure for acquisition mutually beneficial.

TOKEN DISTRIBUTION:

- Exchange placement: 9%
- Stabilization fund: 75%
- Operational needs: 3%
- Team: 10%
- Advisors: 3%

The Allbebet team understands the complexity of the ETH network and its bandwidth for full-fledged implementation betting platforms. Based on this, we engaged razrabotkoi architecture own blockchain to its platform and for other industry participants. At this point to run the platform and test MVP, we chose ERC20 standard.

TEAM

1. Raman Dolny

CEO, Executive Director

2. Dmitry Yakimovich

COO, Operations Director

3. Artur Karapetyan

Head of business development Department

4. Aleksandr Emelyanov

Full stack developer

5. Efimov Dmitry

Head of machine learning Department

6. Vladimir Golovko

Doctor of technical science. Professor

7. Sergei Bezobrazov

Candidate of Technical Sciences. Head of department of neural networks design

8. Sergey Anfilets

Machine learning development engineer

9. Egor Mikhno

Software Engineer, Auto-Encoder Systems Developer

10. Valery Kasyanik

Software engineer. Sports analysis systems developer

11. Vladislav Koval

Head of Marketing and PR Department

12. Sergey Andreev

Head of sports partnership. Senior manager

13. Roman Romanenko

Community Manager

14. Vladimir Nita

Senior lawyer
